

Mercury Relays & Contactors

Our Mercury Relays and Contactors range is suitable for currents from 10 Amps to 150 Amps, ideal when continued frequent switching is required.

- 10 amps - 150 amps
- Enclosed in hermetically sealed containers
- Unmatched quiet and dependable operation
- No external sparks
- Typical applications include resistive heating control, plastic working equipment, industrial processing, oven furnace control, food processing, lighting and traffic control, test / laboratory equipment, HV applications, capacitor discharging, motor and pumps
- 1 pole, 2 pole, 3 pole
- First choice for applications where continued frequent switching is required
- Operate in wide range of temperatures and dust or vapor filled atmospheres
- Unaffected by line noise or voltage spikes
