

Solid State Relays

Crouzet's new generation of Solid State Relays include direct copper bonded technology, with less power to dissipate, this ensures extended life of up to 10 times versus previous generations and competitors.

- 10 to 125 Amp ratings
- Single, Two & Three Phase
- Low thermal resistance due to direct copper bonded technology
- Regulated AC & DC control input
- Zero voltage or instantaneous switching
- Control status LED
- EMC compliant ensuring reliable operation in harsh conditions
- Temperature rating -20 to +80 Celsius
